EXPERIENCE

Nira
Senior Front-End Engineer

- Responsible for planning, developing, testing and deploying several production-ready features.
- Contributed in the development of an Electron desktop application with code-signing and automatic updates.
- Major contribution in the creation of a UI library using Storybook and in moving the codebase to TypeScript.

March 2020 - Present Day
https://nira.com

7egend
Senior Front-End Engineer

- Integrated team responsible for delivering large-scale e-commerce platforms for several high-profile businesses.
- Responsible for multiple solo projects which required setting up the front-end architecture from top to bottom.

March 2018 - February 2020
https://7egend.cr

Amplicare
Senior Front-End Engineer

- Developed several production-ready features for a HIPAA compliant web application using Ember JS.
- Responsible for setting up automated testing for those features and deploying them to a production environment.

March 2017 - February 2018
https://amplicare.com

Euronext
Lead Front-End Engineer

- Developed multiple features for a financial risk-management web application using AngularJS.
- Contributed to the modernization of a legacy codebase.
- Led an application team of two engineers and helped set a front-end development methodology.

October 2016 - February 2017
